Firearms training and Operations module

Chronicle Firearms Training and Operations Module is a unique management system designed in collaboration with police officers to encompass all areas of operational and occupational competence for any officer involved in firearms use or management across a force, collaboration or region.

Linked to a standardised curriculum and national role profiles, Chronicle captures all information required to help your force maintain the National Police Firearms Training Curriculum. You can record training in ranges, on exercises and across force boundaries for all firearms officers and commanders as well as record live operations and deployments to inform your Armed Policing Strategic Threat & Risk Assessment, inform your workforce training plan, improve efficiency and reduce absenteeism from courses. The configurability of Chronicle ensures the system fulfils the requirements of CoP Licence reaccreditation.

When linked to the Chronicle Armoury System which can incorporate door access control, the system allows you to monitor all issue, return and maintenance of weapons across your force, collaboration or region.

JML understands the importance of maintaining both operational and occupational competence of your firearms officers; therefore, to support your use of the software, we offer a Health Check service to ensure your system structure and records meet with CoP licence requirements.

Features and Benefits (generic to all Chronicle modules)

Designed in collaboration with police officers	▪ Tailored to meet the operational demands of your force, collaboration or region.
Robust audit trails	▪ Provide fully auditable and accurate records for any investigation. Protect the individual and your organisation and reduce litigation risk as well as the ability to provide fast, cost-effective responses to FOI requests.
Available on Police ICT and G-Cloud procurement frameworks	▪ Save tender costs and streamline the procurement process whilst reducing your procurement risk.
Feed critical capability & capacity data directly to NPoCC	▪ Eliminate the need for spreadsheets and reduce the administrative burden. Save time and cost whilst providing accurate, real-time information.
Skills exporter and interfaces available	▪ Save time and cost by eliminating double-keying and ensuring data is consistent across systems. Link skills to duties to ensure you have the right people with the right skills in the right place.
Instant 24/7 overview of currently competent officers including commanders linked to individual role profile	▪ Instantly view capacity and capability across your entire force or collaboration to assist in operational and training planning. ▪ Allow for identification of future training needs based on accurate data. ▪ Save money by providing only necessary training to those that require it in order to remain authorised or those that require remedial action.
Notification of expiring licences sent to officers and other nominated recipients	▪ Reduce individual and organisational risk by ensuring all officers remain legally and occupationally competent to safely carry weapons for your force. ▪ Increase public safety by ensuring all deployed officers are competent and remain authorised to carry weapons. ▪ Reduce cost by ensuring you train only officers who need training. ▪ Ensure maximum effective deployable workforce by ensuring officers remain competent ▪ Refresher courses can be planned to ensure officers' authority is maintained without a break.
Easy view training calendar for all courses and refreshers	▪ Ensure appropriate trainer allocation for all courses and refreshers. ▪ Highlight whether trainers, venues or students are double booked ensuring efficient use of resources. ▪ Easily plan and view all courses and refresher periods across all specialisms.
Automatic calendar notification system	▪ Automatically sends a reminder of a forthcoming event, to the student. ▪ Allow resource management units to place students on published courses and refreshers to enable them to maintain operational cover and compliance.
Configurable role profiles	▪ Ensure compliance with National Role Profiles. ▪ Ensure compliance with local or regional STRA role profiles. ▪ Easily amend or add new role profiles according to local, regional or national requirements.
Training analysis	▪ See how many training events you have delivered over a period of time. ▪ Analyse pass and failure rates by various criteria. ▪ Provide accurate training delivery data for internal review and FOI requests.
Record Instructor and Commander CPD	▪ Ensure regulatory compliance. ▪ Protect forces reputation by ensuring training is delivered by competent instructors. ▪ Evidence instructor and Commander portfolios.
Capture Operational Deployments	▪ Provide detailed evidence of officers' operational competence. ▪ Provide detailed evidence of Commanders' operational competence. ▪ Protect the individual and organisation through use of previous deployment data to provide intelligence or identify potential threats. ▪ Enable selection of experienced officers and commanders for high risk operations.
Provides Operational Analysis	▪ Produce a comprehensive APSTRA report. ▪ Analyse deployed tactics and success rate. ▪ Analyse operations by criteria including: Operation type, day of the week, time of day, weapons recovered. ▪ Identify hot spots to enable deployment of appropriate resources. ▪ Identify training and equipment needs.
